

Kelly Engineering Resources Launches Web-based Learning Center

September 6, 2005

TROY, Mich. (Sept. 6, 2005) - Kelly Engineering Resources, a business unit of global staffing provider Kelly Services, Inc. today announced the launch of its Web-based learning center. The Engineering Learning Center offers continuing education courses to Kelly employees worldwide, as well as the engineering community.

"For engineering professionals to progress in their careers, it is important they keep pace with the rapidly evolving technologies of our industry," said Greg Kruger, vice president of Kelly Engineering Resources. "The Engineering Learning Center makes this possible in a convenient and affordable manner."

Classes being offered through the on-line training campus are available 24 hours a day, seven days a week. For nominal fee, engineering courses like AutoCAD and ProE are offered, as well as professional development sessions such as time management, business communication, computer software packages, resume writing, and interviewing.

"Our learning center is structured to meet the needs of every engineering professional, no matter what stage of their career—those just getting started, or those that are more experienced and looking to enhance their skills and career options," said Kruger.
